

Release Highlights

The **26R1 release** introduces updates across Veeva Clinical Data training courses to reflect the latest product capabilities and user interface improvements. New and updated content has been added across Translations, CDMS, EDC, and CDB courses. All users will be automatically enrolled in the **What's New in Veeva Clinical Data for 26R1** course. Within the course, filter by your role to find features most relevant to your tasks.

HIGHLIGHT

Updated Translated Course Library

Translated courses now reflect the latest UI, with new Korean, Chinese, and Japanese content added.

HIGHLIGHT

Expanded Safety Course Content

Training now includes the new Study Drug Management tab to support updated safety workflows.

HIGHLIGHT

Enhanced EDC Workflow

Usability updates include a new form reset process, Local Labs range granularity, and Clinical Reporting navigation features.

HIGHLIGHT

Interactive CDB Hands-on Practice

Select CDB courses now include hands-on spractice for listings navigation, query management, and efficient data review.

Translation Updates

NEW

Library-wide Course Updates

All previously translated courses have been updated to reflect the latest Veeva user interface.

NEW

New Translated Courses

Snapshots added to Korean and Simplified Chinese DM and LDM curricula; Managing Jobs on the Review Tab added to CRA and DM Japanese, Korean, and Simplified Chinese curricula.

CDMS Updates

NEW

Safety Course

Training now includes instruction on the new Study Drug Management tab feature.

EDC Updates

NEW

Local Labs

Local Labs training now includes lower and upper age modifiers when defining analyte normal ranges.

NEW

Data Entry

Updated training now reflects the two-step reset process when resetting forms.

NEW

Listings Enhancements

Clinical Reporting courses now include listings features such as minimize/maximize buttons, Cell Details panel navigation, and hover filtering.

NEW

Redesigned Filter Menu

The filter menu for Clinical Reporting is now data type-specific, improving filtering precision.

CDB Updates

NEW

Hands-on Practice Simulations

Hands-on Practice simulations are now included in CDB courses such as Veeva CDB Overview, Working with Listings, Query Workflow, Review Listings, Data Review Workflow, and Automated Data Checks.

NEW

Listings Enhancements

Veeva CDB Overview and Working with Listings now include listings features such as minimize/maximize buttons, Cell Details panel navigation, and hover-based filtering. The filter menu is now data type-specific.

NEW

Listing Access Configuration

CDB Configurations training now includes the new Listing Access configuration section.

NEW

Clean Patient Tracker Updates

The Clean Patient Tracker now includes Substudy and Latest Event columns.

NEW

Masking and Conditional Unblinding

Training now includes the Enable Data Type-Specific Masking option when masking data.
