Agenda

- Rules
- EDC Tools
 - SDE Enhancements
 - New Data Listings
 - Audit Trail Options
- Safety
- References & Upcoming Dates

Rules

New Functions

The following were added in 21R3:

- Previous / Next comparators
- IsAnyBlank (must compare the same data types)
- AllEqual
- Count
- CountIf
- GetAllMatches
- Text no longer requires format
- Email rules:
 - previous_Submit_Value__v
 - has_value_changed__v
 - submit_counter__v

Check Previous Value in an Item Group

Expression

[Check Syntax](#) [Format](#) [Formula Language Reference](#) [View Rule Bindings](#)

```
1 #define EGDTC @Form.ig_ECG6.EGDTC
2 #define EGDTC_PREV @Form.ig_ECG6[-1].EGDTC
3
4 Not(IsAnyBlank(EGDTC, EGDTC_PREV)) &&
5 EGDTC_PREV > EGDTC
```

#define to create Variables,

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > ECG6 > ig_ECG6 > EGDTC 

This ECG is BEFORE the previous ECG. Please correct so that ECGs are in order, with the earliest ECG first.

Check Next Value in an Item Group

Expression

[Check Syntax](#)[Format](#)[Formula Language Reference](#)[View Rule Bindings](#)

```
1 #define EGDTC @Form.ig_ECG6_2.EGDTC
2 #define EGDTC_Next @Form.ig_ECG6_2[+1].EGDTC
3
4 Not(IsAnyBlank(EGDTC, EGDTC_Next)) &&
5 EGDTC > EGDTC_Next
```

#define to create Variables, Ctrl + Space

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > ECG6_2 > ig_ECG6_2 > EGDTC 

This ECG is AFTER the next ECG. Please correct so that ECGs are in order, with the earliest ECG first.

Check Previous Value in an Event Group

Expression

[Check Syntax](#)[Format](#)[Formula Language Reference](#)[View Rule Bindings](#)

```
1 #define Weight @EventGroup.Visit-1.Vital-Signs.Vital-Sign-Measurement.Weight
2 #define PrevWeight @EventGroup[-1].Visit-1.Vital-Signs.Vital-Sign-Measurement.Weight
3
4 Not(IsAnyBlank(Weight, PrevWeight)) &&
5 (Abs(Weight - PrevWeight)/PrevWeight) >= .1
```

#define to create Variables, Ctrl + Space

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾

Item ▾

this event > Vital-Signs > Vital-Sign-Measurement > Weight 

Weight has changed by more than 10%

Count that AE Term > 0

Expression [Formula Language Reference](#) [View Rule Bindings](#)

```
1 #define COMPLTYN @Form.DSES.COMPLTYN
2 #define AEYN $common_forms.common.Adverse-Event-YN.AE-General-information.AEYN
3 #define AETERM $common_forms.common.Adverse-Event[*].ig_AE.AETERM
4
5 Not(IsBlank(COMPLTYN)) &&
6 AEYN = "Y" &&
7 Count(AETERM) = 0
```

#define to create Variables, Ctrl + Space

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > **DSES** > **DSES** > **COMPLTYN** 

End of Study completion is entered, and AE is reported as Yes, but no AE names are found in the casebook.

Multiple AE Marked as Fatal Using CountIf()

Expression

[Check Syntax](#)[Format](#)[Formula Language Reference](#)[View Rule Bindings](#)

```
1 #define DSDECOD_EOS @Form.DSES.DSDECOD_EOS
2 #define Outcome $common_forms.common.Adverse-Event[*].ig_AE.Outcome
3
4 DSDECOD_EOS = "DEATH" &&
5 CountIf("FATAL", Outcome) > 1
```

#define to create Variables, Ctrl + Space

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > **DSES** > **DSES** > **DSDECOD_EOS**  Only 1 AE should be marked as Fatal

Confirm AllEqual() for Dates

Expression

[Check Syntax](#)[Format](#)[Formula Language Reference](#)[View Rule Bindings](#)

```
1 #define AEEndDate @Form.ig_AE.AE-End-Date
2 #define DTHDAT $seg_EOS.End-of-Study.DD.DD.DTHDAT
3 #define Outcome @Form.ig_AE.Outcome
4
5 Not(IsAnyBlank(AEEndDate, DTHDAT)) &&
6 Outcome = "FATAL" &&
7 Not(AllEqual(AEEndDate, DTHDAT))
```

#define to create Variables, Ctrl + Space

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > **Adverse-Event** > **ig_AE** > **AE-End-Date** 

End date must match Date of Death when Outcome is Fatal.

Tumor Growth Across Weeks Using GetAllMatches()

Expression

[Check Syntax](#)[Format](#)[Formula Language Reference](#)[View Rule Bindings](#)

```
1 #define TRORRES_MEASUREMENT @Form.TUTG2[*].TRORRES_MEASUREMENT
2 #define week_assessed @Form.TUTG2[*].week_assessed
3
4 Not(IsAnyBlank(TRORRES_MEASUREMENT)) &&
5 Max(GetAllMatches("WK1", week_assessed, TRORRES_MEASUREMENT)) < Max(GetAllMatches("WK3", week_assessed, TRORRES_MEASUREMENT))
```

#define to create Variables, Ctrl + Space j

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > TU_TRG > TUTG2 [3] > TRORRES_MEASUREMENT 

Lesion size has not reduced since week 1.

Confirm Two Digits After the Decimal with Text()

Expression [Check Syntax](#) [Format](#) [Formula Language Reference](#) [View Rule Bindings](#)

```
1 #define Weight_Kg @Form.Dosing-Info-IG.Weight-kilograms
2
3 Not(IsBlank(Weight_Kg)) &&
4 Left(Right(Text(Weight_Kg), 3), 1) != "."
```

#define to create Variables, Ctrl + Space

Actions

Perform the following action(s) when the Expression evaluates to true.

Query ▾ Item ▾ *this event* > **Dosing-Information** > **Dosing-Info-IG** > **Weight-kilograms**  Please enter 2 digits after the decimal.

Email Rule to Send Only on First Submission

Expression [Formula Language Reference](#) [View Rule Bindings](#)

```
1 #define Serious @Form.ig_AE.Serious
2 #define AE @Form.submit_counter__v
3
4 Serious = "Y" &&
5 AE = 1
```

#define to create Variables, Ctrl + Space ;

Actions

Perform the following action(s) when the Expression evaluates to true.

Study Data Extracts (SDE)
New Data Listings

Study Data Extracts

- Increased consistency with coding columns to remove spaces
- Included information in the Job History about which options were selected for the job run
- Increased naming consistency between key clinical data columns and system dataset columns
- Added columns for arms and cohorts to the SYS_SUB dataset
- Added the Last Signature Date column to the SYS_FORM dataset
- Added the Item Definition and Lab Analyte Name columns to the SYS_ILB dataset

SYS Dataset
contents are outlined
in [CDMS Help](#)

Study Data Extracts

- Additional columns are available to align with Utilities version 5 to the following System Datasets:
 - **SYS_EVT**
 - Event Group, Event External ID, Last Modified Date/Time of the Event Date, Scheduled Window Status, Dates Outside Window, Expected number of forms, When one or more forms not yet complete - number of days past due
 - **SYS_FORM**
 - Event Group, Event External ID, SDV Required, Date/Time of last SDV Modification, DMR Required, Last Signature Date
 - **SYS_ILB**
 - Event Group, Event External ID, Event Group Sequence, Form External ID, Item Definition, Analyte Name
 - **SYS_Q**
 - Event Group, Event External ID, Event Group Sequence, Form External ID, Whether the data changed after query creation

SYS Dataset
contents are outlined
in [CDMS Help](#)

Audit Trail Exports

- 21R3 Introduced Audit Trail Export by Site
 - Up to ten Sites can be selected for a single job. Like the Audit Trail by Study and Audit Trail by Site jobs, the output of this job will contain a .CSV file for each Subject in the selected site(s)
- Filtering
 - Audit Trail Exports generated from EDC Tools now allow for optional filtering to limit the information included in the exported audit .CSV files.

The screenshot shows a 'New Job' dialog box with the following fields:

- Type:** Audit Trail Export By Site
- Frequency:** Run Now
- Filter by:**
 - Date Range:** MM/DD/YYYY to MM/DD/YYYY
 - User:** (empty dropdown)
- Run on:**
 - Site:** (empty dropdown)

Buttons: Cancel, Run Now

Safety

CDMS Safety Link

Automated

Sites simply submit SAE forms and the system sends Cases to the Safety System. CDMS receives ACKs that are received and parsed

First-Send & Follow Up

Messages included newly captured or changed items in the Submitted state.

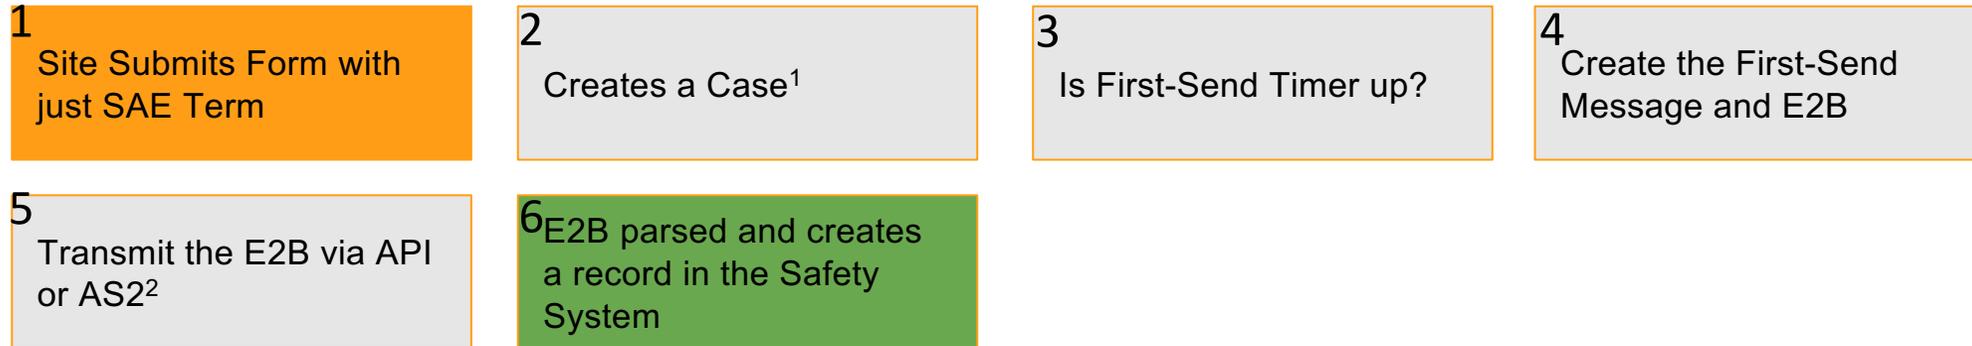

SAE & Related Forms

All SAE Form data that can map to E2B is included in transmitted Messages. It can also include data from several related forms via Form Linking.

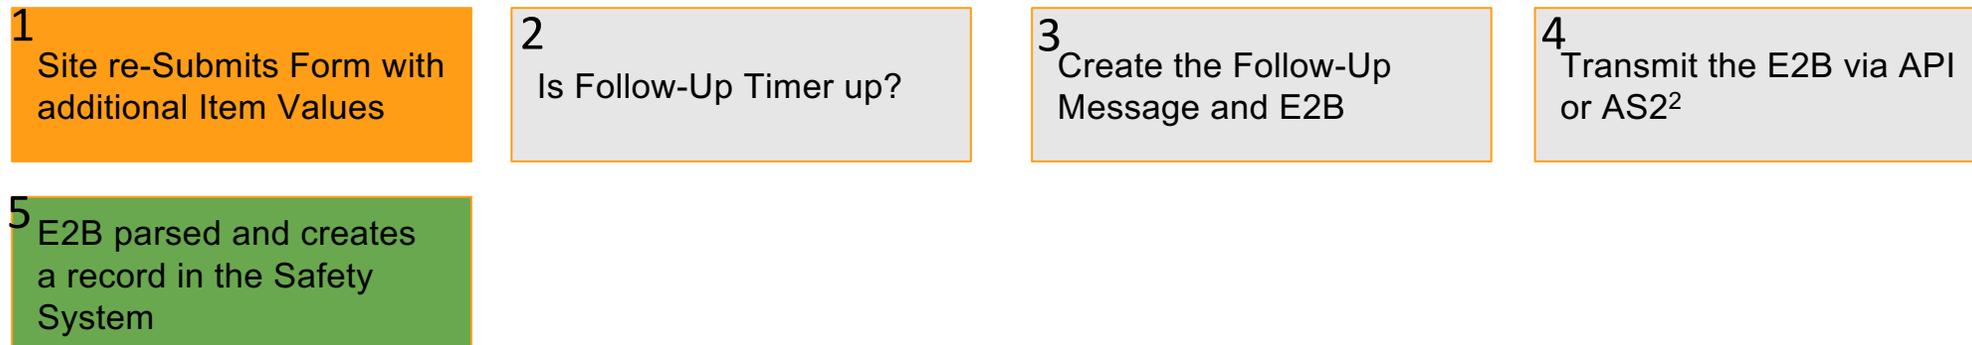

Flow in a Live Study

Site Submits SAE Form Instance for the first time. This creates a Case and the first Message (First-Send).

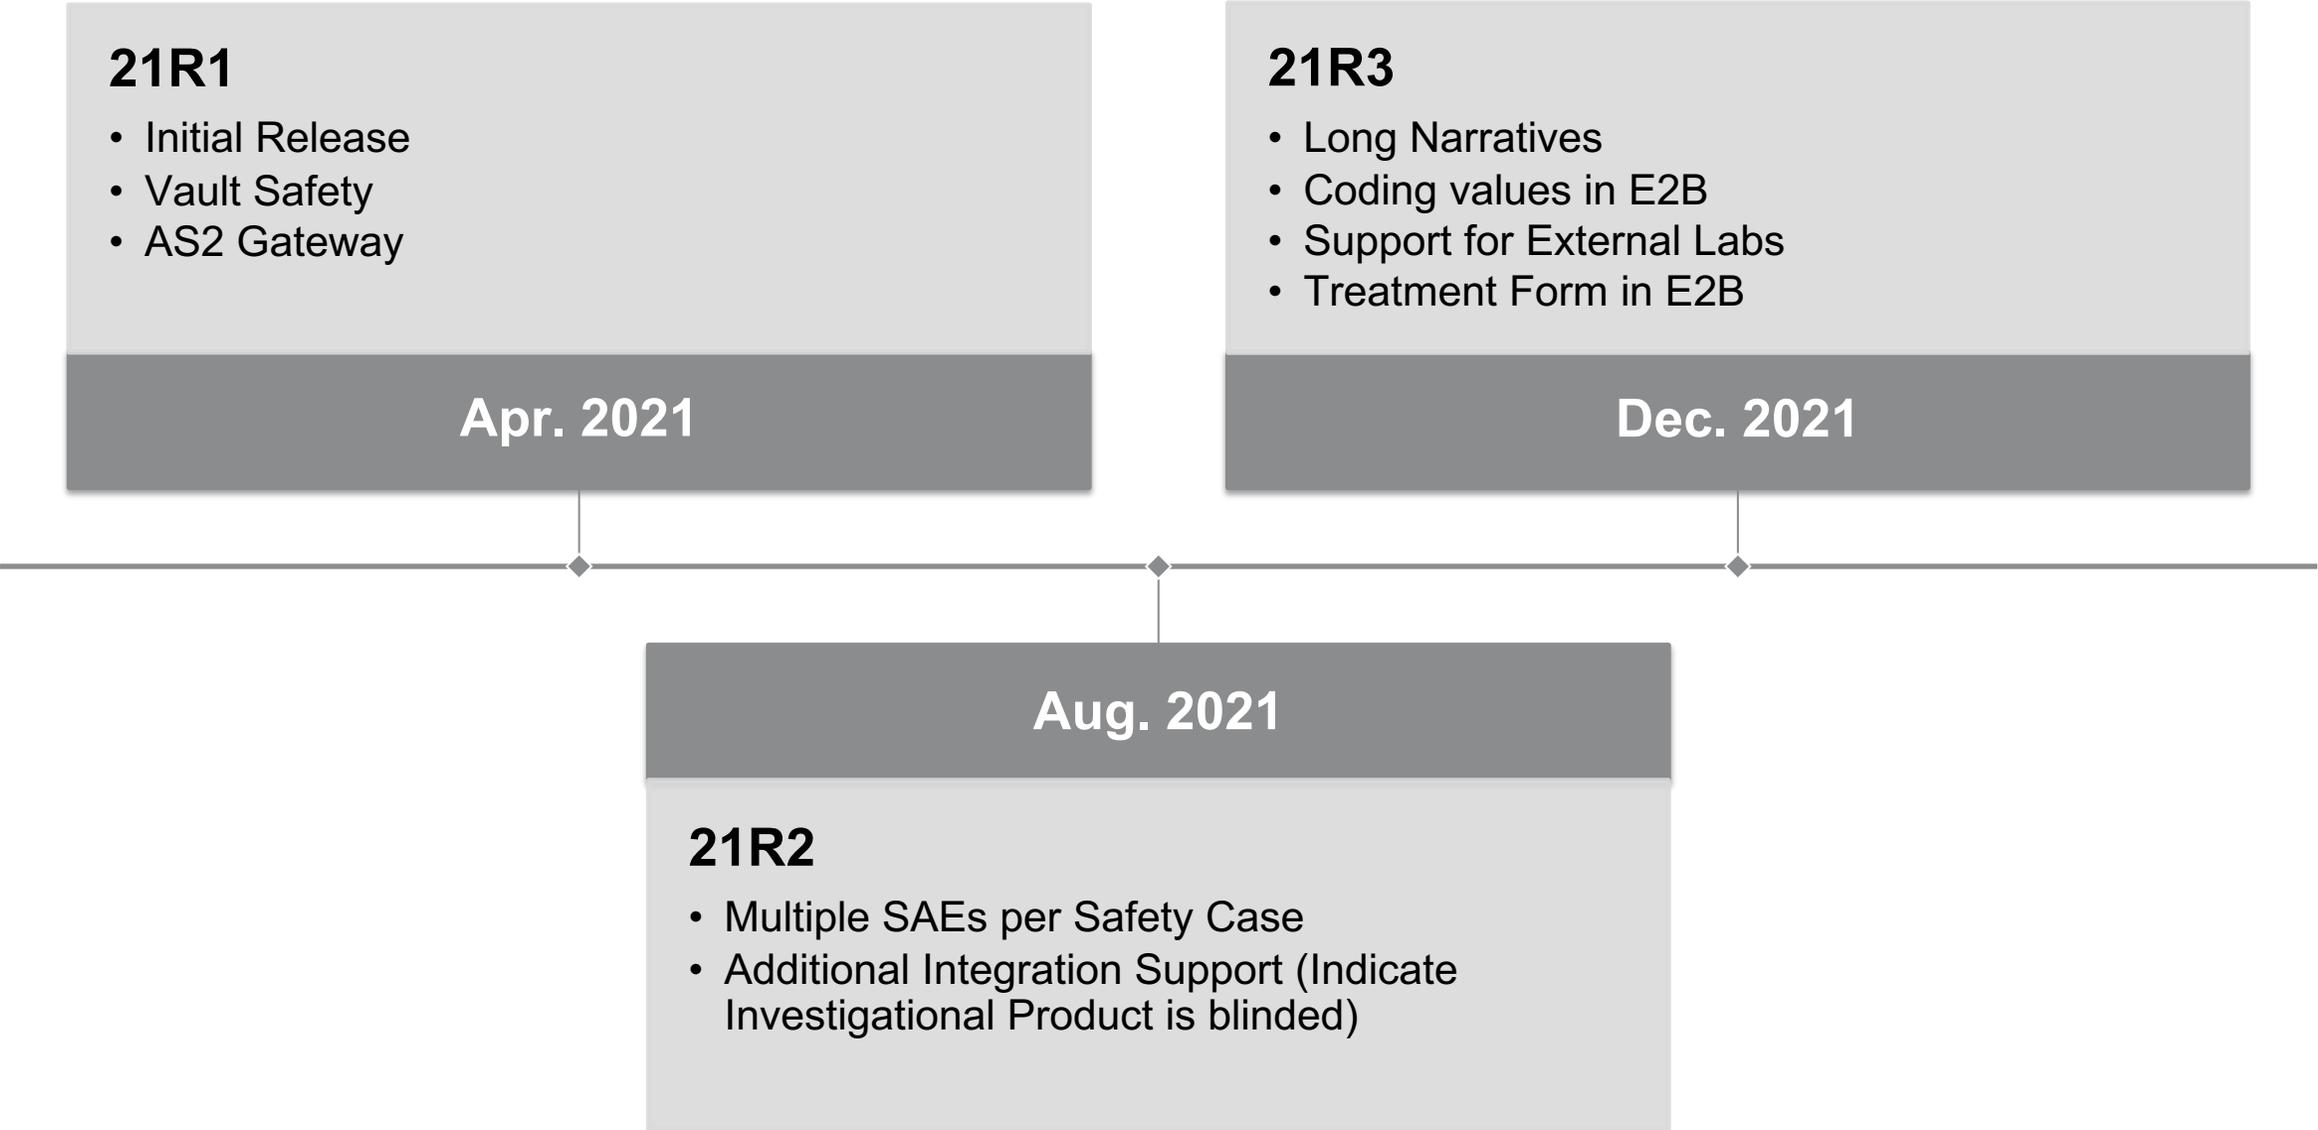

Site re-Submits SAE Form Instance with additional or updated data or updated form linking. This creates a second Message to an existing Case (Follow-Up).

¹ Also use and Send Email Rule to notify an email group on new SAEs. Include relevant Study and Form data in the email

² Data is transmitted via APIs if integrating with a Safety Vault and via AS2 if integrating with Argus or other Third Party Safety System

CDMS Safety Link Timeline

21R3 Updates in Depth

Long Narratives included in XML file Transfer

Up to 100,000 characters for Case Narrative field (repeating item group)

Up to 20,000 characters for Reporter's Comments field on SAE form

Coding Values in E2B XML

Coding values assigned to SAE in Vault Coder automatically included in E2B

Changes to coding values generate follow up message

21R3 Updates in Depth

External Unscheduled Lab Forms

- Safety Admin can map an external unscheduled lab form definition
- If linked to SAE, Safety link will generate follow up message
- E2B will include item values such as lab name, result, unit, lab date, normal range, and more

Treatment Form(s)

- More than one treatment form can be mapped
- First Send or Follow up will include the one Treatment form instance administered most recently prior to Start Date
- Follow up generated if newly submitted Treatment form meets criteria

External Labs

Include External Labs Yes

External Labs Form*

External Labs Fields

E2B ID ▲	E2B Element	Data Type
Fr.1	Test Date	Datetime
Fr.2.1	Test Name (free text)	Text (255)
Fr.3.1	Test Result (code)	Number
Fr.3.2	Test Result (value / qualifier)	Text (50)
Fr.3.3	Test Result (unit)	Text (50)
Fr.3.4	Result Unstructured Data (free text)	Text (2048)

G.k.9.i.2.r.3	Result of Assessment
G.k.9.i.3.1a	Time Interval between Reaction / Event (number)
G.k.9.i.3.1b	Time Interval between Reaction / Event (number)
G.k.9.i.3.2a	Time Interval between Reaction / Event (number)
G.k.9.i.4	Did Reaction Recur

+ Add Treatment

Configuration Components of Safety Link

Connection to Safety System

- Connections are Vault Level
- Connection can either be to Vault Safety over Spark or any Safety System with an AS2 Gateway
- Vault CDMS can support multiple connections to different Safety Systems
- Connections are not part of deployment and are not listed in the SDS

CDMS Help Page References

[Configuring the Safety Link](#)

Study Specific Mappings

- Each study has its own mapping of E2B elements
- Each study is configured with one (and only one) connection to a Safety System
- Mappings and which connection is setup in EDC Tools
- Mapping details are not part of deployments nor are included in the SDS
- You can import and export a mapping file
 - Used to move from UAT to Prod
 - Can also be used from study to study

Considerations During Study Build

- What form data will be included?
 - How will differences in Standards vs E2B values be handled?
 - CDASH/Sponsor Standard codelists vs expected E2B Values (eg. Numeric vs. Text)
 - EDC Multiple Selections (eg. Action Taken) vs. E2B (single value)
 - Allow Multiple SAEs per Case? (requires repeating item groups)
 - Enable necessary form links for related case information
 - Use repeating item groups for long narratives (Item 1000 characters x 100 max repeat Item Group)
- General Settings
 - Reporter
 - Blinded IP?
 - First Send and Follow up schedule
 - Minimum requirements to send
 - Handling of null values for coding

E2B Mapping

- Serious Adverse Events
- Adverse Events
- Concomitant Medications
- Medical History
- Patient Characteristics
- In Case of Death
- External Labs
- Treatment

External Connection

External Connections

LMS Safety

+ New Connection Search

Name	Type	Status ▲
Bryce_Pharma_AS2_Gateway	AS2 Gateway	Active
Bryce_Pharma_Safety_Vault	Vault Safety	Active

Vault Safety

- For integrating with a Safety Vault
- Vault Connections establishes connection between Vault CDMS and Vault Safety
- Vault Safety APIs used to post E2B and receive ACKs

AS2 Gateway

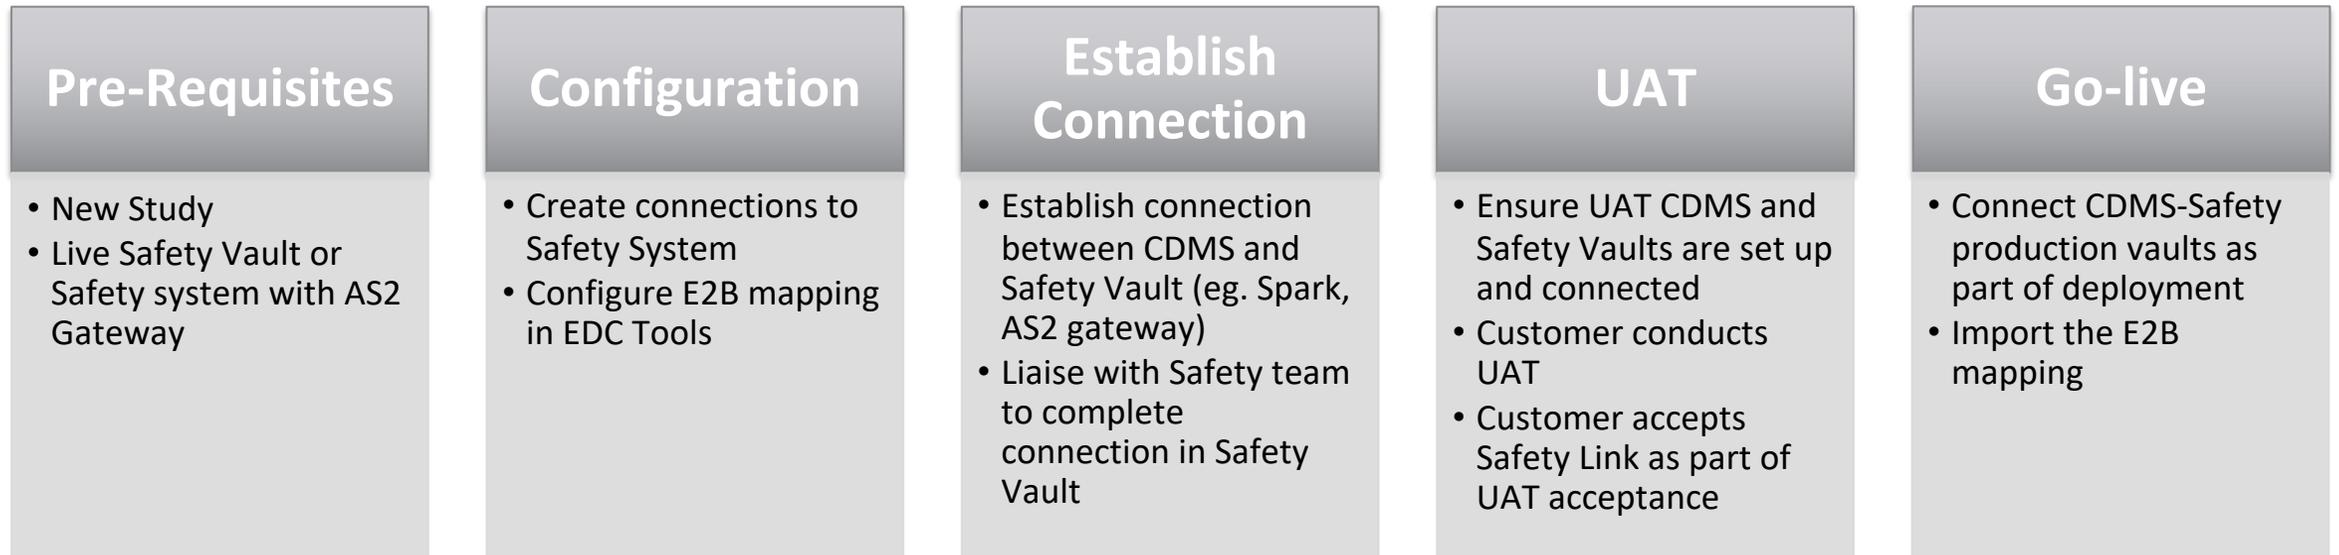

- For integrating with a Third Party Safety Systems (Argus, ArisG, etc.)
- Safety Link provides the CDMS AS2 Gateway
- Requires the Safety System to have an AS2 Gateway (purchased separately)

Fully activating the External Connection of any type requires steps from a member of the CDMS Services Team (costs involved).

Process Flow

Minimum 8 weeks

i Veeva Vault CDMS Maintenance 21R3.0.19- No expected downtime

01/12/2022 7:00 pm PST

There is a 21R3.0.19 maintenance release scheduled for the Veeva Vault CDMS service on Wednesday, Jan 12th at 7:00 PM PT for CDMS PODs:

W1-22 , W1-1090 , W2-2092 , W1-1127 , W3-3121,W1-1139,W1-17,W1-37

Approximate duration is 30 minutes with no expected downtime.

For more details, please visit our [21R3 Release Notes](#)
